Recent work on such subjects as immunity, tuberculosis, dysentery, yellow fever, the bubonic plague, and other infectious diseases has rendered obsolete many portions of any but the most modern books, and in countless minor details the teaching of to-day differs from that of even a few years ago. In this revision the attempt has been made to reflect as faithfully as possible the present status of bacteriology without overstepping the limits set by the scope of a book intended primarily as an aid to students. Much assistance has been derived from the Manual of Bacteriology of Muir and Ritchie, and from F. C. Woods Laboratory Guide to Clinical Pathology.
