The pattern maker must have just the views and dimensions of the machine that will enable him to make accurate patterns for the cast parts. The shopman must be furnished with every detail which he should know in order to finish the pieces to proper dimensions; he must be told just 0 what surfaces to leave rough, which ones to machine in the lathe, and which ones to caliper to thousandths of an inch. It is evident, that the machine draftsman who is to do his work with the highest efficiency must not only be able to draw accurately, but he must thoroughly understand the machines which he is called upon to represent. To one who understands reading drawings, a well-made set of specifications is really a work of art, and it is the aim of the publishers of this little volume to put in the hands of those who are only moderately schooled in the art of mechanical drawing the means of developing themselves in the broader art of machine drawing. The subject has been developed very logically, starting first with the presentation of the details and the conventional ways of representing the parts of simple machines, followed by standard...
