ELECTRONIC COLOR CODE

Alphascript Publishing. Taschenbuch. Book Condition: Neu. Neuware - The electronic color code discussed here is used to indicate the values or ratings of electronic components, very commonly for resistors, but also for capacitors, inductors, and others. A separate code, the 25-pair color code, is used to identify wires in some telecommunications cables. The electronic color code was developed in the early 1920s by the Radio Manufacturer's Association, (now part of Electronic Industries Alliance), and was published as EIA-RS-279. The current...

Reviews

This publication is definitely worth buying. It is written in straightforward words rather than difficult to understand. You are going to like how the writer composed this publication.

-- **Dr. Joaquin Klein**

This pdf is so gripping and exciting. I actually have gone through it and that I am confident that I will go back to read it once again in the future. I discovered this publication from my dad and I advised this ebook to be discovered.

-- **Mr. Elwin McGlynn Jr.**
