Brand New Book ***** Print on Demand *****.Excerpt from Mining as a Profession Including First Stages of Metallurgy To consider man without the earliest primitive contributions of the miner and metallurgist takes us back to savagery. Mans greatest endowment is his wonderful and crafty brain cells with their latent powers of development, which have shown him the necessity of supplementing his own strength by outside aids, and then gradually and persistently obtaining the materials for his needs and fashioning them into tools of power, and finally incorporating and making them a veritable part of his being. His first great advances were the commanding of fire, the use of stone implements, then wooden bow and arrow. By these he worked himself into the stone age, but was still brutal, weak, and with little historical recording power. It was not until he delved below the surface of the earth for materials that he was able to fashion the sword, spear, fire arms, protective armor, plow, hoe, pruning-hook, pitchfork, scythe, tires, axe, saw, plane, etc. It was only with metal tools that great agricultural development began, and it only reached its present magnitude when further supported by the metals in the form of railroads, steam vessels, harvesting machinery, etc. Mining and agriculture are the only basic productive pursuits of man, and they are both fostered each by the other, and both dependent on mother earth. The one skims her surface, the other goes deeper. Agriculture furnishes man with food for existence, but mining gives him the materials for power, art, and civilization. Without metals the scientists tools for experimentation and determination would not be possible, nor the great diffusion of knowledge and thought by means of the...
